- Networking
- Computer Aided Design
- Industrial Automation
- Manual Software Testing

ABOUT ME

I am a dedicated Bachelor of Industrial Technology student majoring in Computer Technology at Cebu Technological University-Ginatilan Extension. I have developed a strong foundation in programming, particularly in C language, and have successfully completed a "Shipping Lines Booking System" project. My expertise extends to networking, including LAN wiring, network assembly, configuration, debugging, and management. Additionally, I have hands-on experience in manual software testing, assessing web-based inventory applications created by BSIT students. I am eager to apply my technical skills in a challenging role, contribute to a forward-thinking team, and further enhance my professional growth.

WORK EXPERIENCE

IT Support Intern   2024 - 2025
